ROHIT PARASHAR

Software Engineer | Frontend Developer | 3 years
+91 9340821225 | rohitparasharsofficial@gmail.com | linkedin | Github

SKILLS & INTERESTS

Technical skills: JavaScript | TypeScript |NextJS | ReactJS | React Query | Redux | HTML | CSS | Tailwind CSS | Git | Gitlab |
Jira | SPA & SSR Technologies.
Other Skills: Agile Software Development | Team Leadership | Divergent Thinking

WORK EXPERIENCE

FusionCode Software Solutions   May 2024 – Present

Senior Frontend Developer   *Indore, India*

- Spearheaded front-end development for a high-performance quick-commerce feature at **PlayAI**, delivering groceries, fruits, and vegetables, optimising scalability with **monorepo architecture** to handle high-volume user traffic while enhancing the overall customer experience.
- Designed and implemented **custom NPM packages**, reducing development time for reusable components by **40%**.
- **Integrated and tested APIs** for real-time inventory updates and order tracking, ensuring seamless user interaction and system reliability**.**
- Conducted extensive unit and integration testing for **PlayAI**, ensuring **99.95%** uptime during high-traffic periods.
- Engineered scalable architecture for the **PlayAI** telemedicine platform, ensuring reliability for **50,000+** monthly users through **Agile methodology**.
- Designed and constructed APIs for a **weight loss tracking feature**, enabling **real-time updates** on progress, including weight, body measurements, and activity levels.
- **Reviewed and merged several pull requests**, ensuring **high-quality code**, adherence to project standards, and **seamless collaboration** within the development team.

Atechnos Pvt. Ltd.   June 2022 – May 2024

Software Engineer   *Gurugram, India*

- Developed the **frontend for the ActionTesa Dashboard** using **Next.js**, managing app activities for over **5,000 users** and ensuring seamless functionality.
- Created a **100% responsive, user-friendly interface** to facilitate **real-time data** and **operational management**, enhancing efficiency by **35%**.
- Collaborated with **backend teams** to integrate **20+ APIs**, ensuring smooth communication between systems and reducing downtime by **25%.**
- Built a **rewards platform** using **Next.js, Redux Toolkit, Bootstrap 5, and Firebase**, supporting over **10,000 active users** and managing **100+ reward options**.
- Integrated **rewards redemption features**, including **Amazon coupons**, **phone recharges**, **DTH recharges**, and **accessory purchases**, streamlining the user rewards process by **30%**.

PROJECTS

Calify - *A meeting scheduling application*

- Designed and implemented a **mono repo architecture** using **Turborepo,** enabling code sharing across services and reducing development time by **30%.**
- Engineered robust backend and frontend integration with Next.js, ShadCN UI, Tailwind CSS, PostgreSQL, and Node.js, ensuring real-time scheduling and **99.9% uptime**. Reduced response times by **35%**.
- Built modular, reusable packages for **shared components** and API integrations, cutting development effort by **40%** while maintaining scalability.

EDUCATION

ITM University   Aug 2018 – Sep 2022

Bachelor of Technology in Electrical Engineering   *Gwalior, Madhya Pradesh*
